SATYAM FIRE

ALL TYPE OF FIRE PROTECTION SYSTEMS

LICENSE NO. MFS-LA/F.0332

We have been helping residences, commercial as well as industrial establishments protect their property, assets and people by providing specialist fire protection services.

We offer a complete fire protection solution from design, certification and installation – right through to inspections, service and maintenance. Our reputation is built on the reliable and quick response services we provide to building developers, building owners and building managers.

CUSTOMIZED SOLUTION

At Satyam Fire, we understand that every building is different, so we take the time to find out exactly what you need. Offering you a customized fire protection solution is just one of the ways we show our outstanding customer service.

SAFETY WITHOUT COMPROMISE

- Any maintenance program we develop for you will comply with building regulations, Indian Standards, the Building Code of India, and any other relevant industry guideline.
- The 'annual maintenance declaration' we provide you with is an assurance that you comply with all relevant legal obligations.
- All flow meters and measuring equipment we use is meticulously maintained and regularly checked by an external party which means you can be assured that the measurements we take are accurate.

OUR EXPERTISE

Whether your project is small or large, simple or complex, our projects division has the expertise you need to estimate, design, and install your fire protection system.

- New developments and construction
- Refurbishments
- Upgrading of existing systems

Our experienced engineers are equipped to design fire safety systems for a range of buildings and industrial applications, including the construction and industrial sectors.

DESIGN

Our fire protection engineers will establish what your individual needs are, and construct designs and project plans to suit. We'll apply new technologies, extensive knowledge and good judgment, to save you money on construction costs, service and maintenance.

INSTALLATION

At Satyam Fire, we keep up to date with new systems and technologies that exist in the marketplace.

Through research and speaking with manufacturers, we stay well informed - so we can offer you the best fire protection solution available. Our qualified technicians are trained to install various types of fire protection equipment, and to ensure your project is carried out quickly and efficiently.

COMMISSIONING

Before completion, your fire protection system will be fully audited and an inventory list completed for handover to our Service and maintenance team.

FIRE DETECTION AND PREVENTION SYSTEMS

Detecting and extinguishing a fire sooner can mean the difference between life and death - because every second counts. It can also determine how much damage is caused to your property.

A fire detection system is an arrangement of fire protection devices put in place to detect fire as early as possible.

Our fire detection and warning systems range includes:

- Hydrant Systems
- Pumps
- Sprinkler Systems
- Smoke Detectors
- Automatic Fire Control Panel
- Fire Hose Reels
- Alarm Systems
- Fire Extinguisher
